Apps and Projects to enhance special and inclusive education II

Do you want to know more about how to use technology to support students with learning disabilities in the classroom?

Featuring:

- Guest Speaker - David Stewart OBE - Former Head Teacher of Oak Field School - Co-development of research with people with learning disabilities
- Using mobile devices to easily measure engagement in inclusive classrooms
- Increasing the uptake of robots in special education
- Co-developing smart objects with students to help them express their emotions

At the event:

- Sessions will be run as a series of short presentations, each followed by demonstrations and discussion allowing participants the chance to pose questions and get answers.
- Get fully updated on developments since last year's event.
